Summary:

The weekly average number of cases of COVID-19 has seen a rapid increase in the number of cases in the last week. Similarly, the biweekly incident rate per 100,000 has increased too and it is 896.5 per 100,000 for the 12/15 to 12/28 time period. The seven-day rolling percent positive tests have been rapidly going up and for the period of 12/22 to 12/28, it was 39.60%. When breaking down the COVID-19 cases by age groups, the age group 20-29 years and 30-39 years have the highest number of cases. With regards to the zip code distribution of the COVID-19 cases, zip code 06606 has the highest number of cases as expected due to its larger population. In addition, both males and females have a similar number of cases of COVID-19.
