

INFLUENZA EPI REPORT: 2022-2023

WEEK 12 – MARCH 25, 2023

BRIDGEPORT – CASES REPORTED THROUGH MARCH 25, 2023

Weekly Number of New Influenza Cases by Age
2022-2023 Season

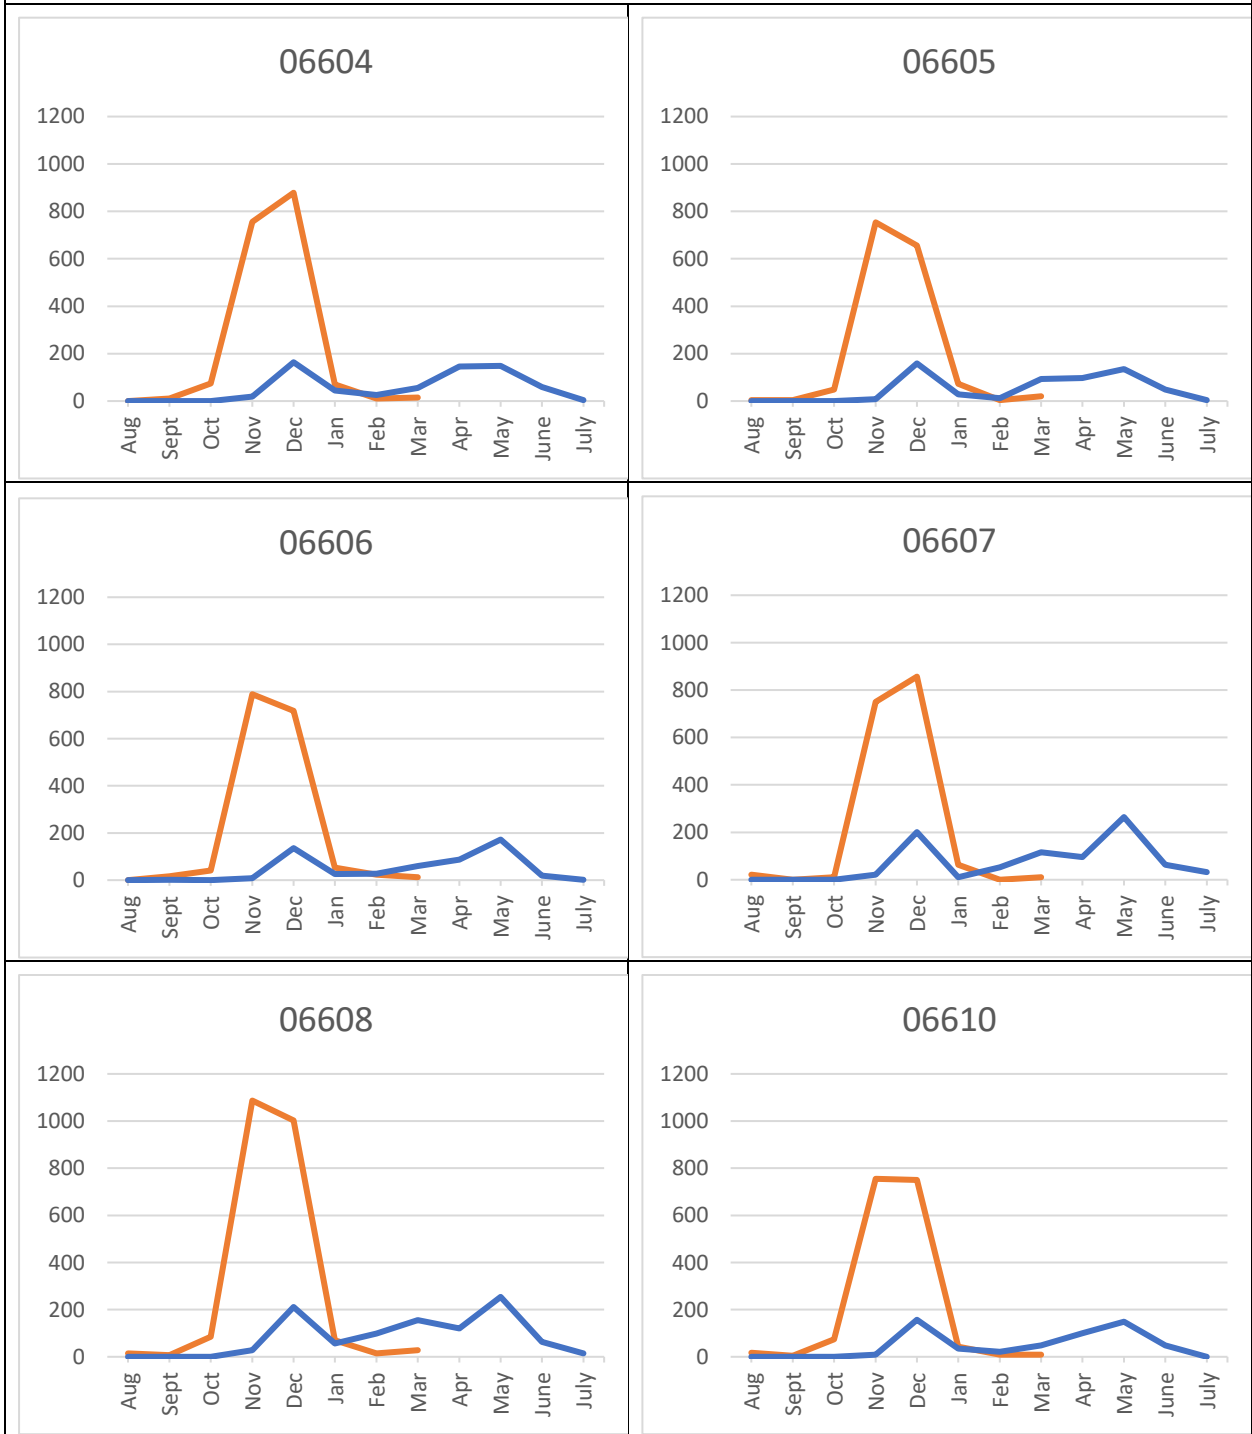

Influenza Weekly Incidence Rate in Bridgeport as of 3/25/2023

Influenza Monthly Incidence Rate per 100,000 by Zip Code as of 03/18/2023

— 2021-2022 — 2022-2023

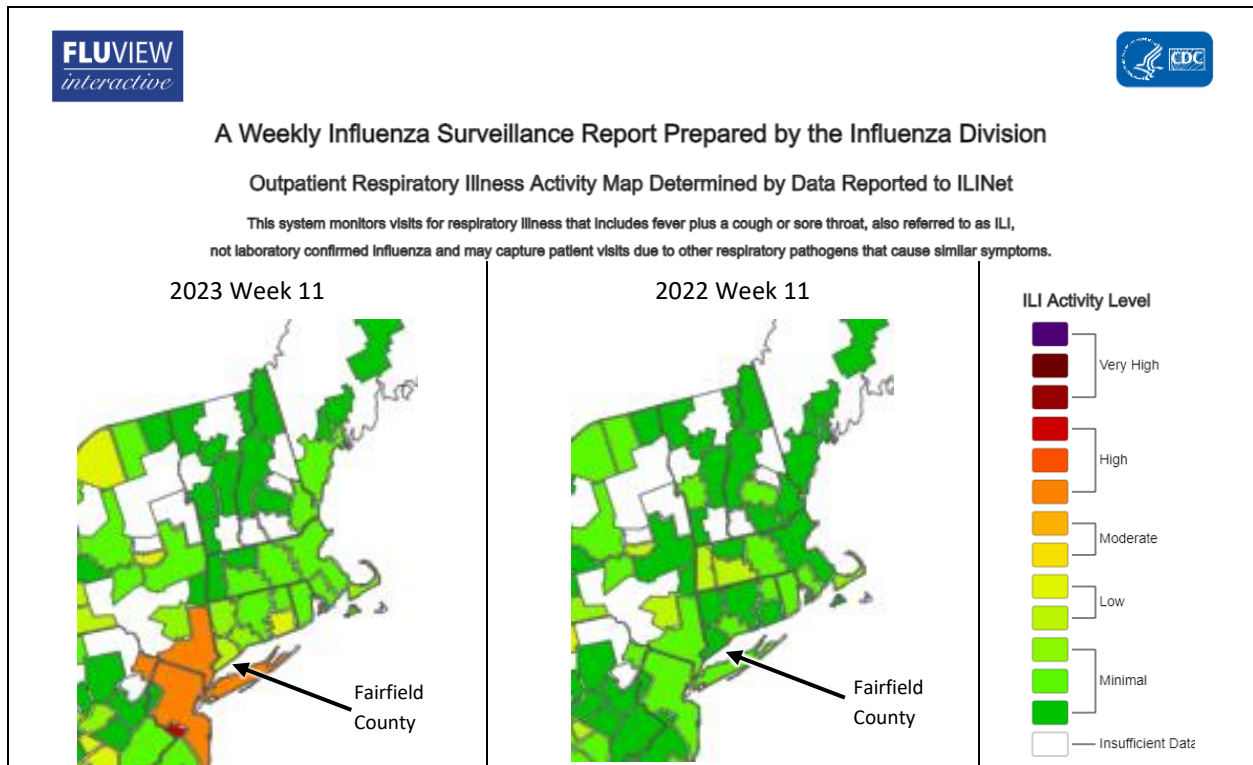

Cumulative Influenza Type Distribution for 2022-2023 Season

**National data does not include subtyping of influenza viruses

CONNECTICUT – WEEK 11 ENDING MARCH 18, 2023

Updated April 3, 2023

*data are incomplete

NATIONAL INFLUENZA MAPS PAST SEASON COMPARISON 2018-2022

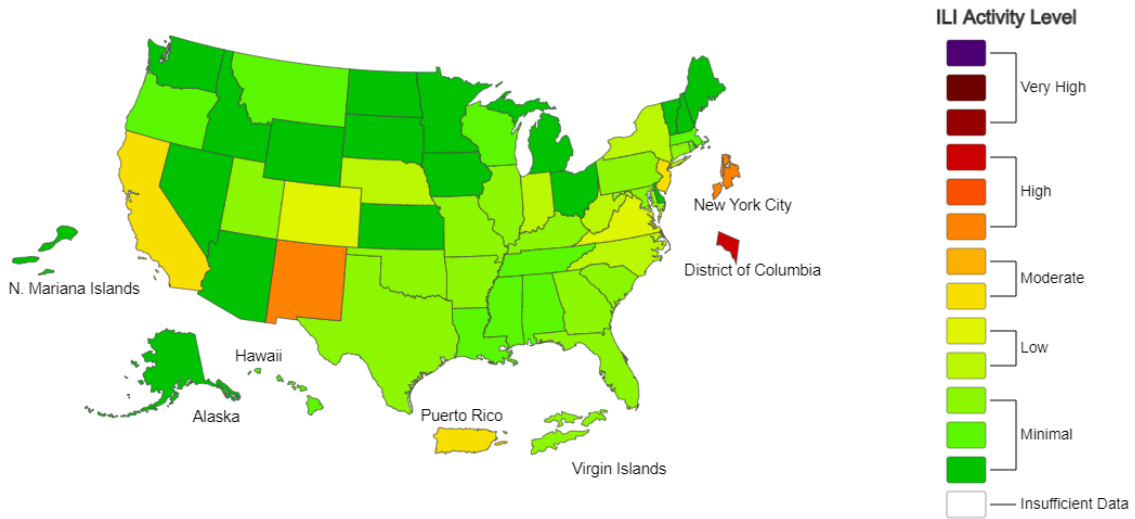

A Weekly Influenza Surveillance Report Prepared by the Influenza Division

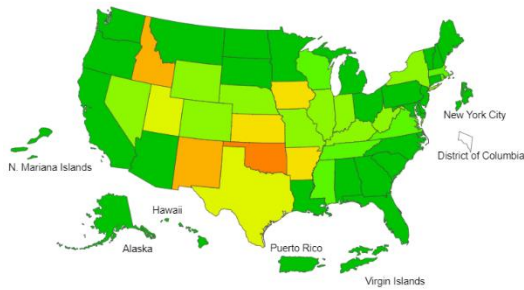

Outpatient Respiratory Illness Activity Map Determined by Data Reported to ILINet

This system monitors visits for respiratory illness that includes fever plus a cough or sore throat, also referred to as ILI, not laboratory confirmed influenza and may capture patient visits due to other respiratory pathogens that cause similar symptoms.

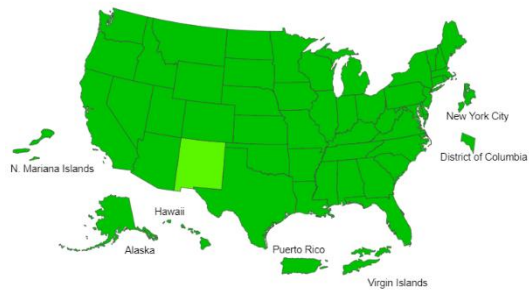

2022-23 Influenza Season Week 11 ending Mar 18, 2023

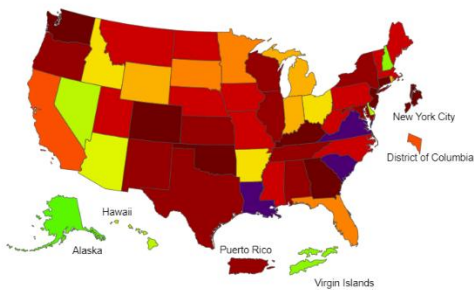

2021-22 Influenza Season Week 11 ending Mar 19, 2022

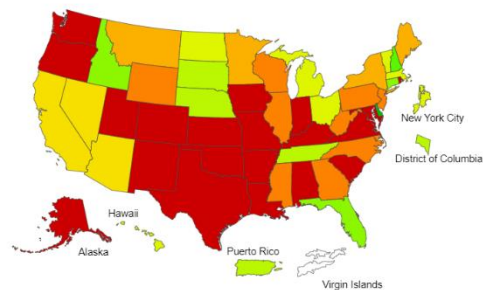

2020-21 Influenza Season Week 11 ending Mar 20, 2021

2019-20 Influenza Season Week 11 ending Mar 14, 2020

2018-19 Influenza Season Week 11 ending Mar 16, 2019

*This map uses the proportion of outpatient visits to healthcare providers for influenza-like illness to measure the ILI activity level within a state. It does not, however, measure the extent of geographic spread of flu within a state. Therefore, outbreaks occurring in a single city could cause the state to display high activity levels.

*Data collected in ILINet may disproportionately represent certain populations within a state, and therefore may not accurately depict the full picture of influenza activity for the whole state.

*Data displayed in this map are based on data collected in ILINet, whereas the State and Territorial flu activity map are based on reports from state and territorial epidemiologists. The data presented in this map is preliminary and may change as more data is received.

*Differences in the data presented by CDC and state health departments likely represent differing levels of data completeness with data presented by the state likely being the more complete.

PRECAUTIONS TO TAKE

- Get vaccinated every flu season
- Cover your coughs and sneezes
- Wash your hands often
- Avoid touching your eyes, nose, and mouth
- Clean and disinfect surfaces that may be contaminated with the flu virus
- Avoid close contact with people who are sick and if you are sick limit contact with others
- If you have the flu, stay home for at least 24 hours after the fever is gone (except to get medical care or other necessities) without fever-reducing medication
- Take antiviral drugs if your doctor prescribes them
