Weekly Number of New COVID-19 Cases by Age

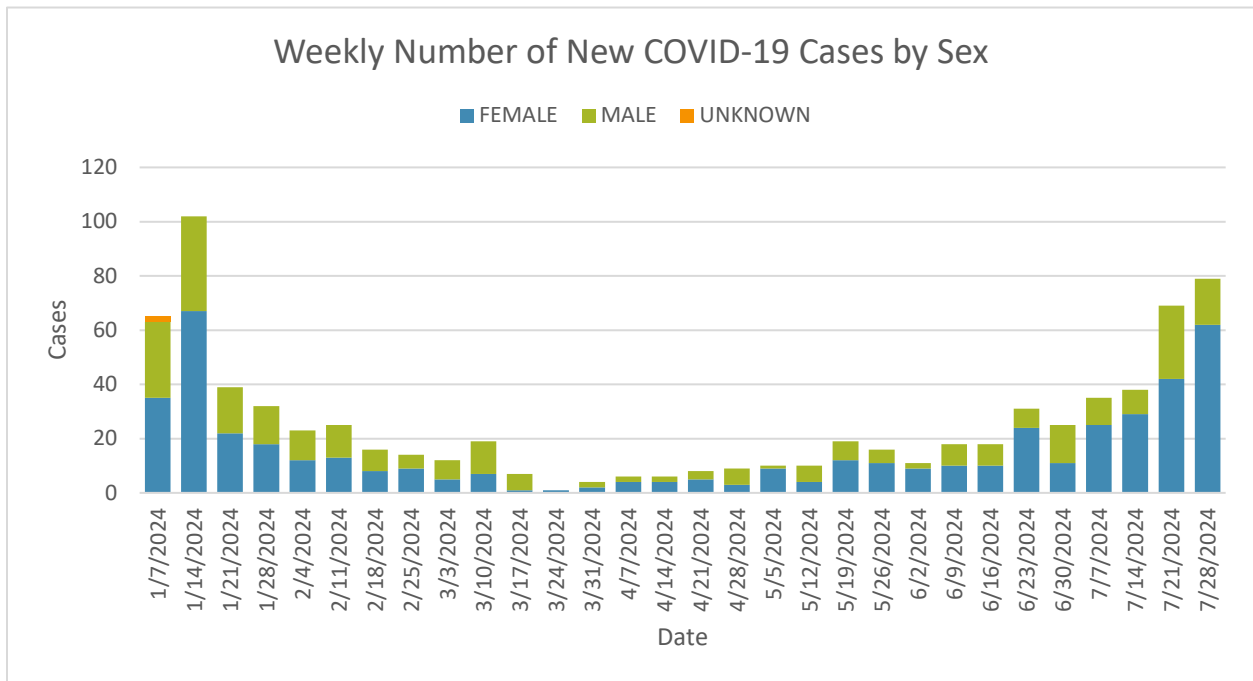

CASES BY RACE/ETHNICITY

CASES BY SEX

SUMMARY

The COVID-19 data for Bridgeport, CT, as of July 28, 2024, presents several trends:

- **Total Cases:** There has been a fluctuating pattern of daily new cases, with occasional spikes. The most significant increase occurred toward the end of July 2024.
- **Incidence Rate:** The 7-day incidence rate has varied, with notable peaks in late July 2024, indicating an upward trend in new cases.
- **Monthly Cases:** The number of cases in Bridgeport has increased significantly since May 2024, with July 2024 showing one of the highest monthly totals.
- **Age Distribution:** Cases are distributed across all age groups, with a recent increase among younger individuals (ages 0-4 and 15-29). The 65+ age group has also seen a rise in weekly cases.
- **Race/Ethnicity:** Hispanic and Black communities have consistently reported higher percentages of new cases, with a significant increase among Hispanic individuals in July 2024.
- **Sex Distribution:** Females have had higher weekly new case numbers compared to males, with a sharp increase in the second half of July 2024.

Overall, the data indicate a resurgence of COVID-19 in Bridgeport, particularly in July 2024, affecting various demographics but with noticeable impacts on younger individuals, females, and the Hispanic community.

PRECAUTIONS TO TAKE

- Get vaccinated
- Wash your hands often
- Follow [CDC masking and isolation guidelines](#) for COVID-19
- Avoid touching your eyes, nose, and mouth

- Clean and disinfect surfaces that may be contaminated with the COVID-19 virus
- Take antiviral drugs if your doctor prescribes them
